Adilet Berdibekov, Front-End Developer

React Front-End Developer specialized in creating high-performance web and e-commerce applications with a user-focused approach. Actively seeking new opportunities to leverage my expertise and passion for crafting intuitive and responsive interfaces.

Experience

Front-End Developer - MBank (Mbusiness)

2022 - Present

- Key contributor in developing B2B banking solutions, including creating adaptive web designs and optimizing online banking functions.
- Working on the creation of high-performance web applications, with a focus on usability and efficiency of the user interface.
- Using the latest frontend technologies in combination with progressive development methods to build efficient and scalable web applications, as well as actively using tools for process automation and improving code quality.

Front-End Developer - CraftLink

2020 — 2022

- Developed and maintained advanced web applications and e-commerce platforms, including interface, functionality, and user interaction.
- Collaborated with product and design teams to ensure product interactions meet user expectations.
- Continuously studied new technologies and frameworks and integrated them into the development process to improve performance and efficiency.

UI/UX Designer - Reliz LTD

2018 — 2020

- Developed and implemented intuitive and adaptive interface designs for various company products.
- Worked closely with development teams to ensure a smooth and efficient interaction between design and functionality.
- Monitored the latest trends in interface design and user experience, and incorporated them into created products.
